Bent Chair Shines with 'The Metallic Collection'

Bent Chair adds another stellar collection under its belt with the launch of the most-awaited Metallic Line with a never seen before Physical Vapour Deposition Technique (PVD). Adhering to our expertise, this collection presents us with textured 304 grade stainless steel surface and titanium coated with PVD process; a technique which has only been employed in the eye wear and tableware industry. It is being used in the furnishing line for the very first time by Bent Chair. The technique makes the products durable, adds an extinguished decorative finish, as well as making it low maintenance.

The collection ranges from home decor accents to furniture pieces featuring uber-luxe elements and creative designs. This series echoes multi-configurative designs while employing quality hardwood and metal together in a versatile frame. The Metal collection will make you discover a myriad of exciting choices for your eclectic style space by having you chose right from our Victorian quilted benches, Tyrion Chair, Tunnel coffee tables, Tristen Bar Cabinets to Maren Display units. The décor accessories will be available in metallic hues of rose gold, gold and copper.

Stonex India Adds Charm With 'Edifice' Collection

This breath-taking collection includes over 300 varieties of marble and natural stones in a wide array of exquisite colours and dazzling textures, curated by Stonex India's experts from Italy, Spain, Greece, Brazil and Turkey.

This collection is a delicate blend of versatile neutrals and bold colours and is available in a multitude of textures which is in sync with the latest trending shades. It also has the power to enrich any surroundings with their rich tones and innovative texture and it is a perfect indicator of the fact that Stonex India is a step ahead of the competition when it comes to providing aesthetic floorings combined with steadfast durability and quality. The 18mm thickness ultra-compact surface gives this design an irresistible charm.
